▼ Front View

- 1. Drive Tray Ejection Button
- 2. LED Indicator (Device Power : Solid Blue / Drive Access : Flashing Blue)

▼ Rear View

Note : In order to function properly, please connect both 15 pin power connectors to the enclosure when using the device

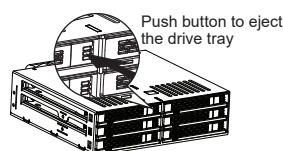

Switch Setting	Fan Speed
High	100%
Low	60%
Auto (Default)	The fan will start at Low setting and increase its speed depending on the HDD temperature. If the HDD exceeded over 40°C (Room temp 25°C), the fan will increase its speed to maximum.

Note : The fan speed control has three settings: High, Low and Auto settings. The High setting sets the fan at its maximum output and in Low setting the fan is at 60% of its maximum output. In Auto mode, the fan speed will adjust accordingly to the temperature of the device.

▼ The ExpressTray supports tool-less drive installation. The patented mechanical design inside the enclosure secures the drive once the ExpressTray been inserted into the enclosure. Please do not flip the ExpressTray when there is a hard drive or solid state drive placed on it.

Optional - Two M3*4 screw can be installed on the bottom backside of the tray fro extra drive stability.
