This bracket is designed to fit 3 x 7mm height 2.5" drives. However, different configurations are possible with various drive height. For 9.5 → 15mm height 2.5" drive installation please refer to section 3 - different drive height Installations.

2-1

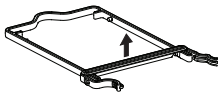

▲ To remove the tray from the bracket, push the tray tabs inward on both sides of the tray to unlatch.

2-2

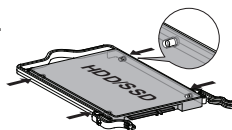

▲ While pushing the tabs inward, pull the drive tray out from the bracket.

2-3.

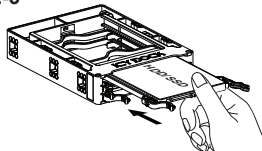

▲ Once the tray is pulled out from the bracket, remove the plastic tray holder from the tray.

2-4.

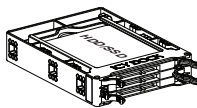

▲ The tray has built-in screws, simply place the drive and align the four screw holes with the built-in screws as shown above.

2-5

▲ Insert the tray all the way in until both side's tray tab are latched to the bracket.

2-6

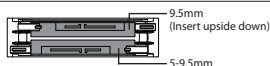

▲ Once the trays are secured, the drive installation process is complete.

Note: Different Drive Height Installations

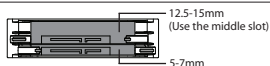

For 5-7mm height drives - Fits 3 x 5-7mm height drives into all three tray slots.

For 9.5mm height drives - Fits 1 x 9.5mm height drive on top slot and 1 x 5-9.5mm height drive on bottom slot. However, the tray on top needs to be inserted upside down into the top slot.

For 12.5-15mm height drives - Fits 1 x 12.5-15mm height drive into the middle slot and 1 x 5-7mm height drive into the bottom slot only.
